Personal Counseling

Personal Counseling is a continuous process before the commencement of a semester in the form of admission process, time table procedure, examination pattern and various curricular, co – curricular and extracurricular activities such as NCC , NSS, Finishing school youth festival, Saptdhara, sports and many more. The students are given individual guidance on the above mentioned topics. Teachers help students selecting core and elective subjects by interacting with them and taking their subject interest into consideration. Students come up with lots of queries regarding form-filling, subject selection, subject change. In the role of teachers, we make best of our effort to address all their queries. When the semester begins, we orient them in the class room on time table functioning and a detailed information and explanation about subject syllabus. The students are also guided on the functioning of CBCS pattern, various credits each subject contains. The students are given detailed explanation about continuous examination and evaluation pattern, significance of assignment, project and field work. In the role of a teacher, we put sincere efforts to address any and every query related to academics faced by the students throughout the year.
